

Getnet Mulugeta Demissie

Addis Ababa, Ethiopia | getnetmulugeta2000@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Data Engineer with hands-on experience building production ETL pipelines, deploying ML models, and shipping full stack data applications. Skilled across the full data lifecycle, from ingestion and transformation to model serving and API delivery.

EDUCATION

Addis Ababa Institute of Technology	M.S. Computer Science	May 2026
Addis Ababa Institute of Technology	B.S. Software Engineering	May 2024

TECHNICAL SKILLS

Data Engineering:	Python, SQL, Airflow, Spark, Kafka, dbt, ETL/ELT, Data Modeling
Data Analytics:	Pandas, NumPy, Tableau, Power BI, Plotly, Dash, Statistical Analysis
Cloud & Infra:	AWS (S3, Glue, Redshift, Lambda), Snowflake, BigQuery, Terraform, Docker
Databases:	PostgreSQL, MySQL, Redis, Elasticsearch, MariaDB
ML & AI:	PyTorch, TensorFlow, scikit-learn, HuggingFace, BERT, OpenAI API, MLflow, Groq, pgvector, RAG
Full Stack:	FastAPI, Flask, Node.js, Express, React, JavaScript, Bash, Git, CI/CD, JWT Auth

EXPERIENCE

Data Engineer	Apr 2025 – May 2026
iCog Labs · Addis Ababa, Ethiopia	

- Engineered Python ETL pipelines and preprocessing infrastructure supporting AI research across CV and NLP domains, feeding model development cycles for research and client deliverables.
- Collaborated with AI researchers to design scalable data architectures enabling reproducible experimentation from raw data to trained models.

Data Engineer	Oct 2024 – Mar 2025
Addis AI · Addis Ababa, Ethiopia	

- Architected Python ETL pipelines processing multilingual audio datasets across 10+ African languages, handling segmentation, noise filtering, and feature extraction into structured storage formats.
- Built and deployed FastAPI services exposing processed NLP data to downstream voice AI and cross-lingual RAG pipelines serving enterprise clients across Africa.

Freelance Full-Stack Developer	Nov 2025 – Present
Upwork · Remote	

- Delivered client projects with 100% job success rate, building full stack web applications using React, Next.js, and Node.js.

TECHNICAL PROJECTS

QueryMind: Production RAG & AI Document Search	View Project
Python · FastAPI · PostgreSQL · pgvector · HuggingFace · Groq LLM · Airflow · Docker · Railway	

- Built a production RAG pipeline delivering streaming AI answers from real documents with session-isolated uploads, pgvector HNSW indexing, and Groq LLM streaming via FastAPI on Railway.

Superstore Dashboard: Interactive BI Dashboard	View Project
Python · Pandas · Dash · Plotly · SQLite · SQLAlchemy · Unicorn · Railway	

- Built an end-to-end BI dashboard processing 9,994 retail orders with KPI cards, regional breakdowns, sub-category profit analysis, and interactive filters by Year, Region, and Category.

TicketFlow: Complaint Routing & ML Classification Pipeline	View Project
Python · Airflow · PostgreSQL · AWS S3 · Docker · FastAPI · LightGBM · Render	

- Built an ETL pipeline processing 1M+ CFPB complaint records; engineered 812K training samples across 9 departments for LightGBM automated routing.
- Deployed via Docker with AWS S3 model versioning, FastAPI serving layer with JWT auth, and role-based analytics dashboards.
